

I. Personal and study details

Student's name: **Sadílek Stanislav** Personal ID number: **516374**
Faculty / Institute: **Faculty of Electrical Engineering**
Department / Institute: **Department of Computer Science**
Study program: **Software Engineering and Technology**
Specialisation:

II. Bachelor's thesis details

Bachelor's thesis title in English:

A Web Application for Managing Group Expenses

Bachelor's thesis title in Czech:

Webová aplikace pro správu a rozdělování výdajů ve skupině

Name and workplace of bachelor's thesis supervisor:

Ing. Martin Ledvinka, Ph.D. Knowledge-based Software Systems FEE

Name and workplace of second bachelor's thesis supervisor or consultant:

Date of bachelor's thesis assignment: **03.02.2026** Deadline for bachelor thesis submission: **22.05.2026**

Assignment valid until: **by the end of summer semester 2026/2027**

Jiří Vokřínek
Digitálně podepsal(a) Jiří Vokřínek
Datum: 04.02.2026
08:45:25
ID: 34199

Head of department's signature

Veronika Sobotíková
Digitálně podepsal(a) Veronika Sobotíková
Datum: 04.02.2026
09:09:05
ID: 31854

Vice-dean's signature on behalf of the Dean

III. Assignment receipt

The student acknowledges that the bachelor's thesis is an individual work.
The student must produce his thesis without the assistance of others, with the exception of provided consultations.
Within the bachelor's thesis, the author must state the names of consultants and include a list of references.

Date of assignment receipt
04.02.2026

Student's name: **Sadilek Stanislav** Personal ID number: **516374**
Faculty / Institute: **Faculty of Electrical Engineering**
Department / Institute: **Department of Computer Science**
Study program: **Software Engineering and Technology**
Specialisation:

II. Bachelor's thesis details

Bachelor's thesis title in English:

A Web Application for Managing Group Expenses

Bachelor's thesis title in Czech:

Webová aplikace pro správu a rozdělování výdajů ve skupině

Guidelines:

1. Create user scenarios for the target application and define its function requirements, investigate and compare existing solutions. Consider in particular the scenarios of adding bills to split between group members and settling debts (with an algorithm that will determine who pays how much to whom).
2. Design the application based on the analysis conducted in step one.
3. Implement your design.
4. Evaluate the application by user testing with at least three participants.
